27 May 1983MEMORANDUM FOR: Mr. David Y. McManis
National Intelligence Office for WarningVIA: *D* Director, Intelligence Community Staff *SP* 27 MAY 1983FROM:
Chairman, Intelligence Information
Handling Committee

25X1

SUBJECT: NOIWON Upgrade

REFERENCE: Your Memo dtd 13 May 1983, same subject

1. The NOIWON telephone conferencing arrangement which was presented to the Washington Area Operations Conference had been informally prepared by DCA in response to work of the NOIWON Working Group chaired by of the IC Staff. Considering the fact that at the conference some discussion took place regarding the capability of this upgrade, I suggest that you review the operating description of the proposed system and make any necessary revisions prior to our approaching DCA for further development of a firm system cost and technical proposal. In order to provide the system capability outlined in the DCA system specification, existing equipment probably cannot be used.

25X1

2. Regarding a resource strategy, I believe that the following alternatives are available:

- a. The system upgrade be funded by CIA as a service of common concern.
- b. Each subscriber of the NOIWON support the cost equally.
- c. DCA or WCHA fund the upgrade.

This area requires further investigation and should be presented to the Director, Intelligence Community Staff and possibly the DDCI during the formulation of the FY 1985-1989 NFIP Guidance.

3. We would be pleased to take the lead for this upgrade, and I recommend that your representative contact of my staff to start firming the system requirements so that we might approach DCA with an official request for technical support.
